

## Provision of Experienced Technicians

### Challenge

3sun Group were tasked with supplying the client with technicians capable of undertaking a range of worksopes across multiple sites on 4MW turbines. The worksopes required of 3sun Group included Installation, Mechanical & Electrical Completion, Snagging, Retrofits and 500hr Servicing. As well as this, scopes were required to be undertaken simultaneously across each site.

### Solution

The client was supplied with highly experienced multi-skilled CTI Team leaders and tower technicians across each site.

### Results

The 3sun Group technicians completed each of the worksopes tasked to them within the clients timescales and to a high quality.

### Maximising Our Value

3sun Group provided technicians experienced on 4MW turbines with the relevant qualifications required for each workscope. This experience allowed us to provide greater efficiency in the completion of the work, work being completed within the clients deadline at a high quality. Our technicians high level of experience was used to train and mentor client technicians who were also on site.
